Industry Introduction

The military aerospace manufacturing industry is surrounded by experimental developments, research, military aircraft, missiles, and space missiles. Primarily being marketed toward the bigger goal of providing defense electronics and gadgets for government defense contracts. Industry Leaders include well-known companies such as Lockheed Martin, BOEING, Northrop Gunman, Airbus etc. The industry had a $353.6B market cap in 2026 global revenue with a 5.0% annual growth rate from 2021-2026. Alongside a $454.7B projected market revenue by the year 2031and forecasted 5.2% annual growth from 2026 leading up to the year 2031. Through an international lens, there are prominent international counterparts such as Airbus (Europe) and Aviation Industry Corporation of China (AVIC) who also hold a strong contribution the defense industry. Three primary companies I choose to analyze deeper for this research paper are Lockheed Martin (United States), Airbus Defense and Space (China), & BAE Systems (Europe). Lockheed Martin in the lead holding 20.1% of Market share, Airbus in second with a 5.4% market share, and coming in last of the three chosen BAE systems with a 4.0% market share holding shown in *Figure 1*.

Global Military Aircraft and Aerospace Manufacturing Market Shares of Three Selected Companies in 2026

Source: Jozkowski (2026), IBISWorld, Global Military Aircraft & Aerospace Manufacturing, p. 4.

Note. Shares represent company revenue within the defined military aircraft and aerospace manufacturing industry, rather than company-wide revenue. Data from Jozkowski (2026), Global Military Aircraft & Aerospace Manufacturing (IBISWorld Report C2544-GL), p. 4.

Company #1, Lockheed Martin

Heading levels 1-3 get their own paragraph, as shown. Headings 4 and 5 are run-in headings used at the beginning of the paragraph. Include a period at the end of a run-in heading. Double-space all text, including headings. Use descriptive headings to help readers identify sections of your paper.

Heading Two

If needed, you can include consecutive paragraphs with their own headings, where appropriate. For APA Style formatting, type your own references. To correctly format a reference page according to APA Style guidelines, see page four.

Heading Three

When citing any quote or text that consists of three or more lines, APA guidelines call for block-quote format:

> Create a new paragraph to begin the block-quote. Double-space each line of text, as you have done with headings, section labels, and paragraphs of paraphrased text. To correctly format a block-quote, indent each line of the text to one-half inch. Remember to always cite your source. Last Name (Year) citations can be used when writing a paper in narrative form. Parenthetical citations are also appropriate (Last Name, Year).

Heading Four: When using headings, don't skip levels. If you need a heading 3, 4, or 5 with no text following it before the next heading, just add a period at the end of the heading and start a new paragraph for the subheading and its text.

Heading Five. Like all sections of your paper, references start on their own page, like the page that follows this one. All in-text citations should be included your references.
